

Tire-SafeGuard

Tire Pressure Monitoring System

SIMPLY THE BEST SYSTEM FOR MONITORING ALL VEHICLE TIRES

Tire-Safeguard automatically monitors vehicle tires and provides a timely warning of abnormal tire pressure, allowing the driver to immediately take corrective action. The system's digital display makes tire pressure maintenance easy; the user no longer has a need to manually check the tire pressure with a pressure gauge, as the accurate tire pressure is readily displayed to the user.

FEATURES

- Water tight external valve stem mounted sensor for easy installation.
- Monitoring in real-time of tire pressure up to 145 PSI with accuracy of +/- 1 PSI.
- LCD digital display showing actual PSI for each tire and outside temperature.
- Providing immediate alerts of rapid tire pressure change, slow air leak, low pressure, and high pressure
- Monitoring around the clock with detection of abnormal tire pressure even while vehicle is parked.
- Sensor batteries lasting 8 to 10 years of normal vehicle use
- Separate receiver and display allowing flexibility during installation
